

Local Revenue Measures June 2006 rev6/8

On June 6, 2006, voters in California considered nearly 100 local measures¹ related to local agency taxes, fees and financing. Fifteen (15) of these measures concerned city taxes, fees or financing. Ten (10) concerned counties or countywide programs and six (6) concerned special districts. There were sixty-six (66) school measures including school bonds and parcel taxes. Among the fifteen city measures, eight (8) were special taxes requiring 2/3 voter approval and seven (7) concerned general taxes requiring majority voter approval. Three of the ten county measures were majority vote general tax proposals.

Supermajority vote requirements again proved formidable. While seven out of ten (7/10) city/county tax majority vote general tax measures passed, just nine of twenty-four (9/24) 2/3 vote non-school¹ measures passed. Among school measures only one of eight measures requiring a 2/3 vote passed, but thirty-six (36) of the fifty-eight (58) 55% vote school bonds passed.

Transient Occupancy (Hotel/Motel) Taxes

Four cities three counties presented proposals to increase hotel/motel taxes (Transient Occupancy Taxes) to their voters. Two of these measures merely extend the TOT to campgrounds, but do not increase the tax. Both passed. Voter's in Solana Beach approved the city's 3% increase earmarked for coastal visitor and beach maintenance programs. But Inyo County's proposed 3% increase, restricted to law enforcement, failed to garner the necessary 2/3 approval. Two of the three TOT increases for general purposes received the needed majority vote approval.

Transaction and Use Taxes: General Tax Measures

Voters in three cities and one county considered proposals to increase transactions and use tax add-ons to the local sales tax for general purposes. In Santa Clara County, the proposal to continue the county's expiring ½ cent tax failed. Among the three city measures, National City passed a full one cent increase and Woodland extended its expiring ½ cent tax, while voting on three separate advisory measures as to the use of the revenue. But the ½

cent tax increase proposal in Mammoth Lakes was turned down. National City joins the small city of Trinidad (Humboldt County) as the only cities to pass a 1% add-on sales tax (transactions and use tax).

Transaction and Use Taxes: Special Tax Measures

Voters in two cities and six counties considered transactions and use tax (sales tax) measures earmarked for particular purposes. All failed to achieve the required 2/3 approval including four countywide transportation measures. All were for new tax increases, not extensions of existing taxes. Del Norte County’s ¼ cent for libraries came the closest to passing with less than 60 votes short. Although five of the eight measures exceeded 55% voter approval, two of the eight measures garnered less than a simple majority, including Solano County’s third attempt at a transportation sales tax.

City Parcel Taxes and Other Special Taxes

There were four parcel taxes in three cities on the ballot. In addition, the City of Alturas proposed a “supplemental charge” (i.e. tax) per water meter to fund mosquito abatement programs. A measure to extend the existing parcel tax for parks passed in Davis, and Albany voters passed new taxes for libraries and for public works projects. But despite more than 60% yes, the City of El Monte parcel tax and the City of Alturas water meter charge failed to achieve the necessary 2/3 approval.

Special District Parcel Taxes

Parcel tax proposals in four out of six special districts passed. Only the Amador County Vector Control District's parcel tax failed to garner over 55% of the vote, but the Cambria Health Care District came up short of the 2/3 approval needed with 63% yes.

Other Notable Local Measures

The City of Solvang will remain a general law city as its voters turned down a proposed charter. Voters in Santa Barbara overwhelmingly rejected a proposal to split the north-western portion of the county into the new Mission County.

Napa County voters defeated an initiative measure similar to Oregon's controversial Proposition 37. The measure would have made the county financially responsible if its changes to land use laws resulting in lowered property values. Meanwhile, they approved an initiative measure by the same proponent requiring county supervisors to certify in writing that they understand any ordinance that they vote "yes" on.

School Parcel Taxes

All six parcel tax measures proposed by school districts failed to get the required 2/3 voter approval, although seven of the eight received more than 55% yes votes and all received a majority of yes votes.

School Bonds

There were sixty (60) school bond measures on the ballot for a total of \$6 billion in proposed bond authorizations. Two of the measures required a 2/3 approval for passage because they did not meet Proposition 39 limits. The others needed 55% approval. Voters authorized \$4 billion of local school bonds in approving thirty seven (37) measures, including a 2/3 vote measure in Ross (Marin County). Absent the 55% vote threshold permitted by Proposition 39, just eleven (11) of the measures would have passed.
